

# Quality of Life Technology Center Seminar Series presents...

## QoLT Industry Panel

Learn about exciting careers in Healthcare and Quality of Life Technology

**Date:** Thursday, January 31, 2008

**Time:** 3:00-4:00 PM Panel Introduction  
4:00-5:00 PM Open Discussion  
5:00-6:00 PM Networking Hour

**Location:**  
Distributed Education Center (DEC)  
at the Collaborative Innovation Center (CIC) at CMU

**Directions found at:**  
<http://www.ini.cmu.edu/about/dec.aspx>

**Website:**  
<http://www.qolt.org/Education/EventsCalendar.jsp>

We welcome faculty,  
students, and anyone  
interested to attend!

Refreshments will be served.

For more information, please contact  
Mary Hershberger at 412-365-4892

### Speakers:

**Tom Seder**  
Lab Group Manager, GM Research & Planning  
for General Motors Corporation

General Motors is the world's largest automaker and has been the global industry sales leader for 76 years. Founded in 1908, GM today employs about 284,000 people around the world. With global headquarters in Detroit, GM manufactures its cars and trucks in 33 countries.

**Soundararajan Srinivasan**  
Research Engineer for Robert Bosch LLC

The Bosch Research & Technology Center North America was established in 1999 with labs in Palo Alto, CA and Pittsburgh, PA. These labs focus on innovative research and development in the areas of sensor and communication technologies, MEMS integration techniques and RF applications, new powertrain concepts, 3D technologies, communication systems for automotive and industrial applications, human-machine-interaction, software engineering, and software intensive multi sensor / multi data source systems.

**Jeff Pepper**  
President and CEO of Touchtown, Inc.

Touchtown Inc. is the retirement industry's leading provider of products to improve the quality of life for older adults and their families. Touchtown's flagship product, TV+, is the industry's most widely used service for creating in-house television channels and delivering them to resident rooms, in lobbies and common areas, and on the web. Touchtown also provides the industry's most widely used senior-friendly email and resident web portals.

**Ela Lewis**  
Director of Product Management for Myomo

Myomo is pioneering development and commercialization of non-invasive NeuroRobotics™. NeuroRobotics is a new category of medical device technology designed to enable individuals to self initiate and control movement of partially paralyzed limbs using their own biological signals. With this capability, NeuroRobotics helps people relearn how to move affected muscles by simultaneously engaging and reinforcing both neurological and motor pathways. No electrical stimulation or invasive procedures of any kind are employed.

**Dave Aune**  
Research Director for Seagate

From protecting treasured family photos and personal music collections to developing next-generation consumer electronics devices and large enterprise networks, Seagate delivers advanced digital storage solutions to meet the needs of today's consumers and tomorrow's applications.
